

FRENDZ

BETTER VIBES.
ZERO BULLSH*T.

Real connections. No games. No minors. No noise.

The complete look at Frenz before anyone else sees it. Every screen, every feature, and every decision that separates a real product from another app promising "safe" and quietly failing to deliver it.

A Note Before You Swipe

From the team building Frendz

Every dating and friend-finding app on your phone was, at some point, a single idea that somebody decided to actually build. Most of those ideas quietly gave up on the hard part. They chased growth first and safety later, if at all. We built Frendz in the opposite order.

This catalogue is the product of that decision. It is not a marketing deck written to sound impressive. It is a precise, screen-by-screen record of what Frendz actually does, why each screen exists, and what happens the moment you tap it. If a feature is in here, it is in the app. If it is not built yet, we say so plainly.

Frendz is an adults-only space, eighteen and over, full stop, checked before a profile can even be created. That single decision shaped nearly everything else on the pages that follow.

We hope this makes you want to be one of the first people through the door.

The Frendz Founding Team

FOUNDER & CEO CORRESPONDENCE · CLINELUKE39@OUTLOOK.COM

Colour, Type & Voice

One accent colour, used everywhere, on purpose. Deep black and charcoal so the red glow has somewhere dark to live.

PRIMARY

Cool Red

#FF003F

Crimson

#C9184A

SECONDARY

White

#FFFFFF

TEXT

Charcoal

#191919

BACKGROUND

Frendz

INTER BOLD · BUTTONS & HEADLINES

Inter Regular carries the everyday voice of the interface. It stays quiet and legible across dashboards, forms, settings, and long paragraphs of documentation and support copy.

INTER REGULAR · BODY COPY & PARAGRAPH TEXT

Continue →**Learn more →**

ROUNDED, PILL-SHAPED, UNMISTAKABLY FRENDZ. THE SAME BUTTON SHAPE APPEARS ON EVERY SCREEN IN THIS CATALOGUE.

"Deep black and charcoal backgrounds, the signature cool-red glow as the one accent colour that shows up everywhere."

03

SECTION THREE

Getting In

Six screens stand between opening the app for the first time and landing on a finished profile. Every one of them is doing quiet, deliberate work.

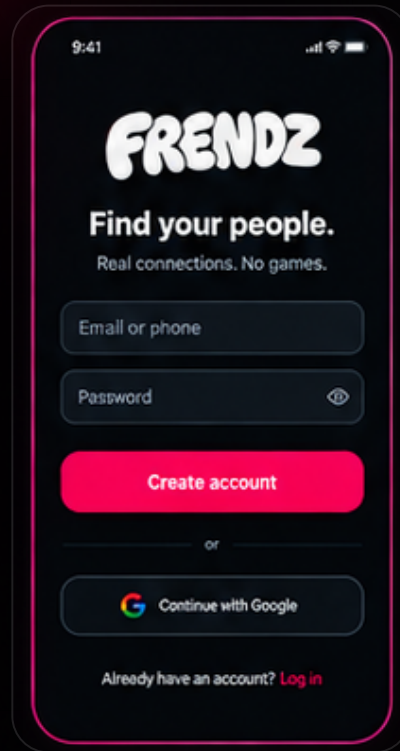

GETTING IN

PAGE 05

First Impressions, Handled Carefully

01 · SPLASH SCREEN

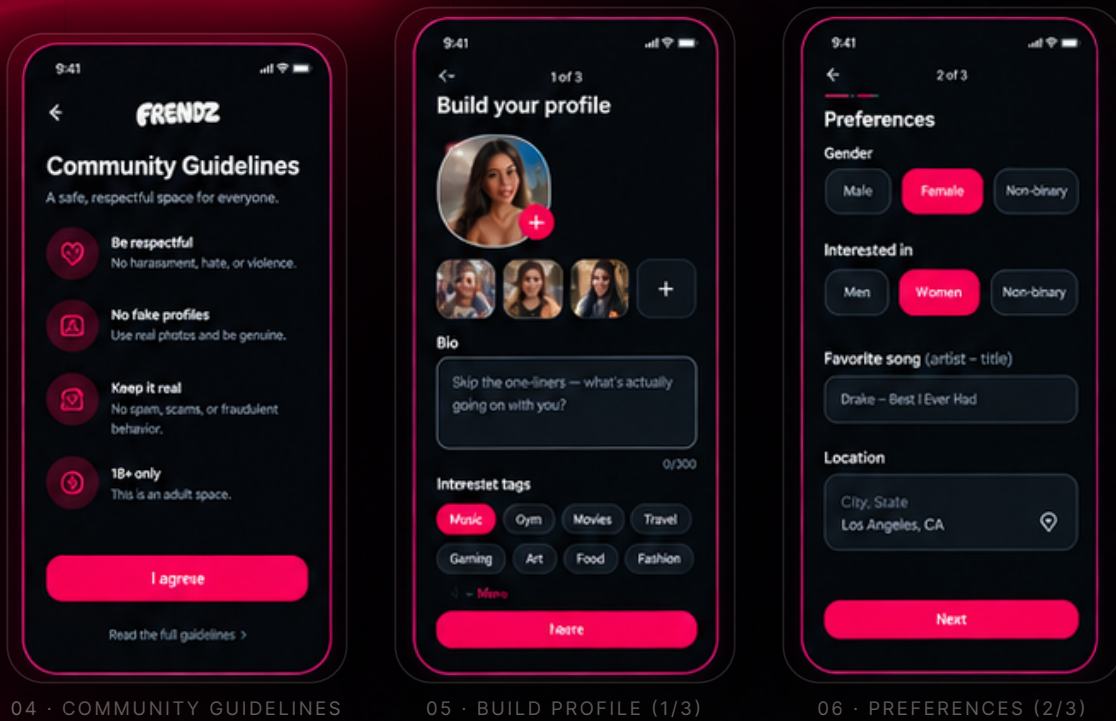

02 · SIGN UP

Splash Screen — The FrenDz wordmark sits inside a slow, animating red glow the instant the app opens. Before a single tap, the tone is already set: dark, bold, a little electric.

Sign Up — Email and password, or skip the form with Continue with Google. A quiet "Log in" link waits underneath. No username field to overthink either.

WHAT	WHY IT MATTERS
Two ways in	Email and password, or a single tap with Google, Apple or Twitter. No forced form for anyone in a hurry.
No blank-field problem	Skip the username and FrenDz quietly builds one from the email address instead.
Hard 18+ gate	Checked through a real date picker before anything else loads. Under 18, and the app stops you on the spot.
Guidelines first	Nobody reaches the profile builder without agreeing to the same Community Guidelines everyone else on FrenDz already accepted.

Rules First, Then A Real Profile

Four plain rules: be respectful, no fake profiles, keep it real, eighteen and over only. One tap to agree — nobody builds a profile without seeing this page first. From there, three short steps build a real profile: a photo and bio, what you're into, and where and who.

STEP	COVERS
1 · You	Photo, bio, interest tags.
2 · What You're Into	Gender, who you want to meet, favourite song.
3 · Where And Who	Location, starting age range and distance.

"Three steps, no walls of text, and by the end you already have a real profile, not a half-finished placeholder."

05

SECTION FIVE

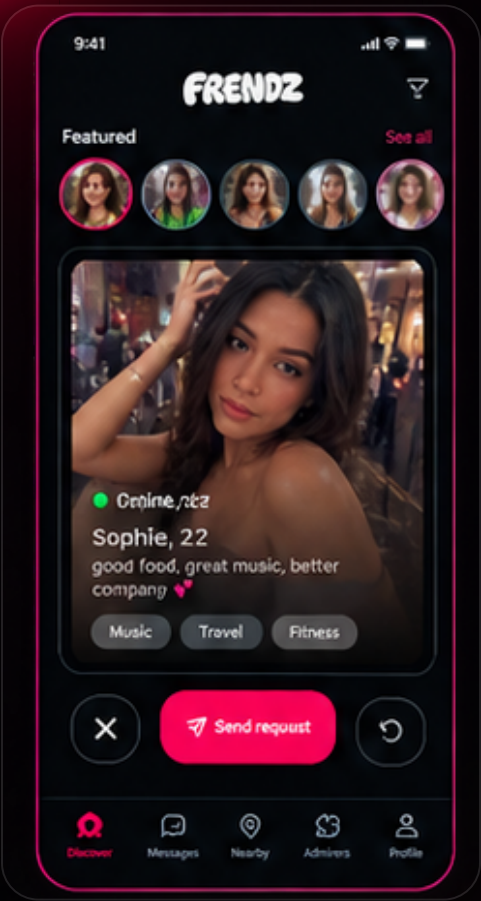

The Deck

Home base. A full-screen stack of people, built to feel fast, one hand, one thumb, keep going.

THE DECK

PAGE 08

Every Card, Taken Apart

07 · DISCOVER (SWIPE DECK)

The Featured strip up top surfaces a handful of standout people before you even start swiping. Below it, one full card at a time: photo, name, age, online status, a short bio, and interest chips pulled straight from that person's profile.

GESTURE	WHAT HAPPENS
Drag left	Pass. Gone, no notification sent to them.
Drag right / tap send	Sends a request, opens a quick-reply composer first.
Tap the card	Opens their full photo set before you decide.
Undo	Instantly brings back the last card you passed on.

What Every Card Is Quietly Telling You

ON THE CARD	WHAT IT MEANS
Photo, name & age	The essentials, always visible, never hidden behind a tap.
Music crush badge	Appears the moment you and someone else both list the same favourite artist.
Distance	How far away they are right now, pulled from live location.
Online status	Whether they're active this second, so you know if a message will land immediately.
State & zodiac sign	Pulled automatically from their profile and birthday. Nothing to type in twice.
@username	A consistent identity across Discover, Nearby, Chat and their full profile.

Refresh reloads the deck. **Undo** instantly restores the last card you passed on. **Tap instead of drag** opens a person's complete photo set before any decision is made.

Nothing about the Deck is accidental. Every element on a card either helps someone decide faster, or gives them one honest reason to say something real.

What You're Doing Right Now

If a profile is who you are, a Flare is what you're doing right now, and it gives someone the perfect excuse to reach out.

Posting one takes about 15 seconds

- 1. Tap your own photo at the top of the app.
- 2. Snap a photo or video, or grab one from your camera roll.
- 3. Add a caption, a thought, a question, a lyric, anything.
- 4. Hit Post.

Attach a quick prompt to make replying effortless: "Reply with a song," "Ask me anything," "Rate this," or "Who's around tonight?"

DETAIL	HOW IT WORKS
How long it lasts	24 hours, then it's gone for good.
Photos or clips	Up to 3 per Flare.
Video length	Up to 15 seconds each.
Who sees it first	People you're already talking to, and people nearby.
Delete early?	Yes. Anytime, in one tap.
See who viewed it?	Yes, privately, never shown publicly.

| Nothing you post sticks around, so there is never any pressure to make it perfect.

07

SECTION SEVEN

Chat

Once you're talking, everything happens here. Built to feel like a real conversation, not a messaging tool bolted onto a dating app.

CHAT

PAGE 12

Three Lists, One Conversation View

08 · MESSAGES · RECENT

09 · CHAT THREAD

Online status — live, or exactly how long ago someone was active. 2m, 1h, 3d. Never left wondering.

If something feels off — Block and Report sit in a three-dot menu, one tap away, no confrontation required.

INSIDE A CONVERSATION	HOW IT BEHAVES
Text	Type and hit send, or just tap Enter.
Photos	Every image is automatically screened before it is ever sent, so what lands in the chat is safe.
Voice messages	Hold the mic button to record. It turns into a playable waveform bubble you tap to hear.
If something feels off	Report opens a short safety form. Block cuts the person off instantly. No explanation required.

08

SECTION EIGHT

Nearby & Admirers

For when you'd rather scroll and pick than swipe one card at a time, and for knowing exactly who is already paying attention to you.

NEARBY & ADMIRERS

PAGE 14

A List To Scroll, And A Room Full Of Interest

10 · NEARBY

11 · ADMIRERS (FREE)

Nearby — a simple, searchable list sorted purely by distance. Hit Request straight from the list with a friendly "Hey!" ready to send.

Admirers — everyone who has already shown interest, blurred and locked behind Frendz+ until you upgrade. Tap a card to see their full profile.

FEATURE	DETAIL
Distance at a glance	Every row shows exact distance, name, age and a verification badge if they're verified.
Search	By name or favourite artist. An empty search says so clearly instead of a blank screen.
Request from the list	No need to open a full profile first, a default "Hey!" is ready to send.
Music-crush badge	Shown on Admirers cards whenever you share a favourite artist with someone who liked you.
New to Frendz?	A friendly "no admirers yet" screen explains the feature instead of leaving an empty void.

09

SECTION NINE

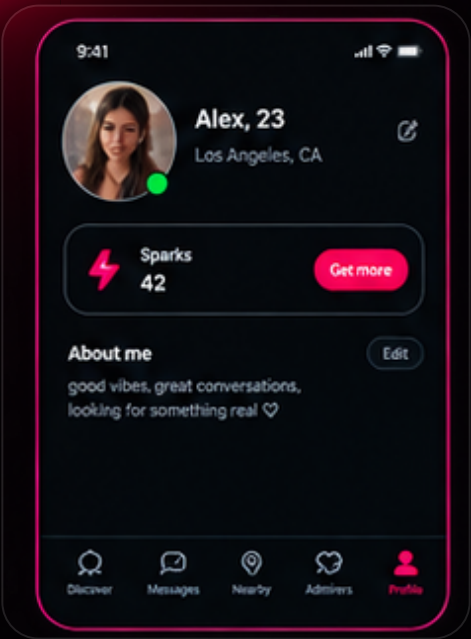

Your Profile

More than one photo and a bio. A set of slides you build yourself, like your own little story that anyone can flip through.

YOUR PROFILE

PAGE 16

Slides, Not A Static Page

12 · PROFILE

Building your slides — each slide is a full photo card, customised from scratch. Tap anywhere to add text and drag it into place. Search Apple Music and attach a song, artwork included. Every new photo goes through the same safety screening as chat photos before it ever goes live. Nothing publishes until you hit Save.

VIEWING A FULL PROFILE	WHAT YOU SEE
Photo carousel	Full-screen and swipeable, page dots at the top show how many slides there are.
On someone else's profile	Name, verification badge, online status, age, state, zodiac and location.
Music-crush badge	Shown if you share a favourite artist with that person.
Message box	Pinned at the bottom, so you can reach out without leaving the screen.

10

SECTION TEN

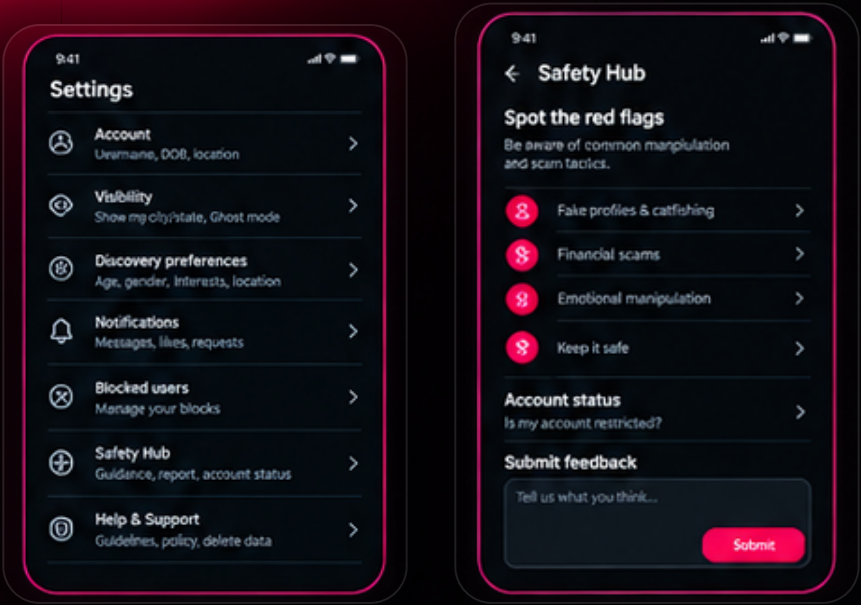

Safety & Settings

How you're seen, who can reach you, and how you're protected. All in one place, none of it buried three menus deep.

SAFETY & SETTINGS

PAGE 18

Nothing About This Is Hidden

13 · SETTINGS

14 · SAFETY HUB

Settings — Account, Visibility with a fully incognito Ghost Mode, Discovery Preferences, Notifications, Blocked Users, and Safety Hub.

Safety Hub — plain-language cards on fake profiles, financial scams and emotional manipulation, plus a one-tap report form.

CONTROL	WHAT IT DOES
Incognito	Browse without ever showing up in someone else's Deck.
Read receipts	Decide whether people can see when you've read their messages.
Discovery preferences	Age-range sliders, max distance, and who you're interested in seeing.
Blocked users	A simple list of everyone you've blocked, with Unblock always available.
Delete account	Available in one tap, no retention tricks, if you ever decide to leave.

11

SECTION ELEVEN

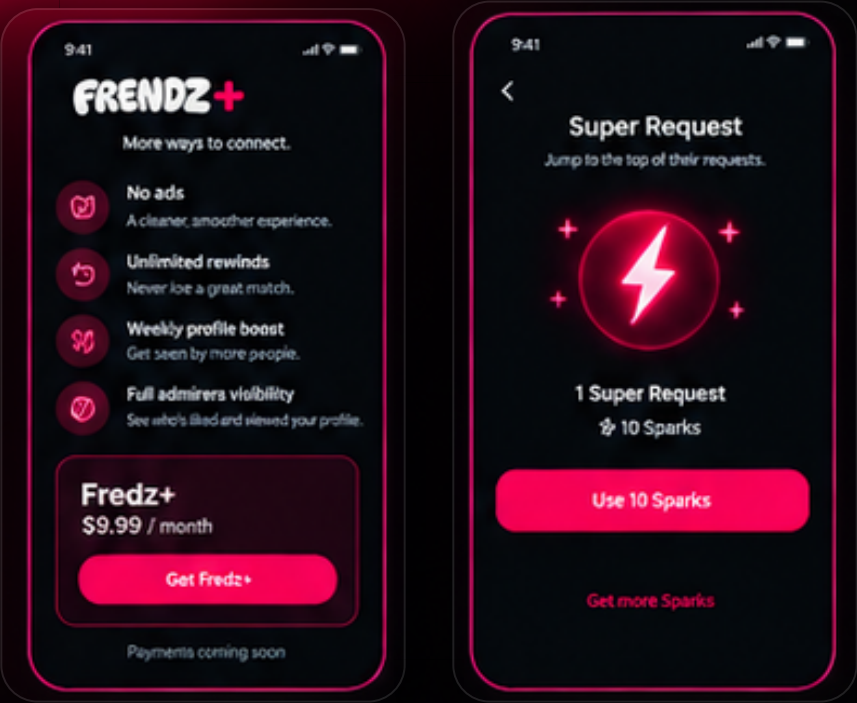

Frendz+ & Sparks

More ways to connect, for the people who want them. Nobody needs to pay to be safe on Frendz. This is entirely optional.

FRENDZ+ & SPARKS

PAGE 20

Optional, Transparent, Never A Paywall On Safety

15 · FRENDZ+ UPGRADE

16 · SUPER REQUEST

Frendz+ — no ads, unlimited rewinds, a weekly profile boost, and full admirers visibility, at \$9.99 a month. Payments are marked "coming soon" ahead of launch.

Super Request — jump to the top of someone's requests for 10 Sparks, a visible in-app currency shown right on your Profile card.

FRENDZ+ INCLUDES	DETAIL
No ads	A cleaner, smoother experience throughout the app.
Unlimited rewinds	Never lose a great match to a fast swipe.
Weekly profile boost	Seen by more people, automatically, once a week.
Full admirers visibility	See exactly who liked and viewed your profile, unlocked from the paywalled preview.

The Things You Feel Before You Notice Them

Built For Your Phone

Designed mobile-first, on purpose. Open it on a laptop and Friendz politely asks you to grab your phone instead, with a QR code to jump straight there.

No App Store Needed

Friendz installs straight to your home screen like a native app, icon, full-screen launch and all, without ever touching an app store.

It Feels Alive

Smooth swipe physics on the Deck, slide transitions on your profile, small motion feedback everywhere. Nothing feels stiff.

Online Status, Everywhere

Live "online" or "last seen" badges wherever a photo appears, on cards, in chat, on a full profile.

Music Crush

A little heart badge the instant two people list the same favourite artist, an honest conversation starter that costs nobody any effort.

Zodiac Signs

Pulled automatically from a birthday at sign-up, shown everywhere with a small emoji, never typed in twice.

Every screen built to make meeting people feel less like an app, and more like actually meeting someone.

Built To Replace What Failed You

A wave of swipe-to-meet apps built for teenagers, Wizz among the most widely used, were pulled from the Apple App Store and Google Play in early 2024 after child safety researchers and reports to organisations including Canada's Cybertip.ca documented widespread sextortion and coercion of minors on the platform. The pattern is public record: age verification that could be bypassed, moderation that arrived only after harm was already widely reported, and a product built for a userbase too young to be there in the first place.

Frendz starts from a different premise entirely: adults only, safety designed in from the first screen, not patched in after the fact.

WHERE IT MATTERS	THE OLD PATTERN	FRENZ
Age verification	A checkbox, easy to click past.	A real date-of-birth gate, enforced before a profile can even be built.
Who's allowed in	Users as young as 13, mixed with adults.	Eighteen and over, full stop, no exceptions.
Photo safety	Moderation added after harm was reported.	Every photo automatically screened before it is ever sent or posted.
Reporting trouble	Buried in submenus, if it exists at all.	One-tap Report and Block, identical everywhere in the app.
Community rules	Optional, easy to skip.	Mandatory agreement before any profile exists.

The honest version — no app can promise perfect safety. What Frendz can promise is that safety was a design requirement on day one, not a feature added after regulators or the press got involved.

14 · REQUEST EARLY ACCESS

Get In Before Everyone Else Does
